Hi Matthias,

Thanks for taking the time to let us know. Our team is currently investigating the account in question to determine if the content or activity violates GitHub's [Terms of Service](#).

Disruptive users can be blocked by following the instructions found below:

[Blocking a user from your personal account](#)

[Blocking a user from your organization](#)

Please let us know if we can help in any other way.

Regards,

GitHub Trust & Safety

Report Content: tobiasdiez (content)

<https://github.com/tobiasdiez> <https://github.com/sagemath/sage/issues/36666#issuecomment-1805078169>

Reason

A user is harassing or trolling me or someone I know.

Comments

The user tobiasdiez has been harassing me and disrupting my development activities in this GitHub project.

I have reported this to the project's committee in charge per Code of Conduct, sage-abuse@googlegroups.com, by email on Oct 25, 2023.

After an initial action by the committee, removing the user tobiasdiez from the Maintainer role of the project on Nov 21, 2023, the committee has ignored my further reports of abuses by tobiasdiez using his Triage team privileges (emails from Nov 28, Dec 5, and numerous follow-ups).

Here in <https://github.com/sagemath/sage/issues/36666#issuecomment-1805078169> tobiasdiez is making a false claim of authorship. When I called him out for it, he continued to make more false claims. The sage-abuse committee has so far declined to even respond whether it will be handling my complaint (email of Nov 24, 2023, Jan 10, 2024).

In <https://github.com/sagemath/sage/pull/36753#issuecomment-1826257380> (Nov 25, 2023), tobiasdiez makes the insinuation "Do you just want to make my work on [#36524](#) harder?".

In <https://github.com/sagemath/sage/pull/36561#issuecomment-1791874122> (Nov 2, 2023), tobiasdiez makes more accusations, and abuses his Triage privileges to override the label set by reviewers that marks the PR as ready for merging by the release manager. This has blocked the PR from being merged.

tobiasdiez has been removing such "positive review" labels set by reviewers in numerous PRs, even on some PRs where tobiasdiez was not participating as a reviewer: <https://github.com/sagemath/sage/pull/36697#issuecomment-1809287191>, <https://github.com/sagemath/sage/pull/36338>, <https://github.com/sagemath/sage/pull/36348>, <https://github.com/sagemath/sage/pull/36561>, <https://github.com/sagemath/sage/pull/36676>, <https://github.com/sagemath/sage/pull/36678>, <https://github.com/sagemath/sage/pull/36694>, <https://github.com/sagemath/sage/pull/36697>, <https://github.com/sagemath/sage/pull/36726>, <https://github.com/sagemath/sage/pull/36951>, <https://github.com/sagemath/sage/pull/36953>, <https://github.com/sagemath/sage/pull/36964>

During a period in early January, he was clearly using an automated script for this purpose; I called him out for this in <https://github.com/sagemath/sage/pull/36953#issuecomment-1883769511> (I don't know if he is still operating the script now.)

This email is a service from GitHub Support.
