Hi Matthias,

Thanks for taking the time to let us know.

If you have write permissions to a repository, you can hide, edit, or delete comments by using the tools described here:

[Managing disruptive comments](#)

Additionally, users with admin permissions in a repository can permanently delete an issue from a repository by following these instructions:

[Deleting an issue](#)

Keep in mind, you may block users at any time by following the steps outlined in either of the articles below.

[Blocking a user from your personal account](#)

[Blocking a user from your organization](#)

We're happy to take a closer look at the account in question to determine if any action beyond maintainer moderation is necessary. If you have any additional details or information to share with us at this time, feel free to do so, and please let us know if we can help in any other way.

Regards,

GitHub Trust & Safety

Matthias Köppe
