Dear Matthias,

We would like to inform you that the committee examined the comment (<https://github.com/sagemath/sage/pull/37951#issuecomment-2098991324>) you made regarding the fact that the CI is broken. Although it points to the reason why the CI isn't working, we find that bringing up a PR in the way you did (referring to it as a "bullet", even though you are answering to "shot") is not relevant to the situation, and because you had already made the point elsewhere, it is not moving the discussion forward. We would advise you to use a more neutral tone when giving this information in the future.

Best regards,
The SageMath Code of Conduct Committee

Reminder to the committee that I'm waiting for a serious response to many serious open questions.

> many serious open questions.

thanks for your message to sage-conduct. I am replying as an individual member of the committee to get some clarification about your request. It would be helpful if you could be more specific and point us to the explicit messages where you think we still need to follow up (e.g. by giving us the subject and timestamp.) I'll make sure to add these to our agenda then.

julian
