Someone needs to have a serious word with Dima.
The toxicity is out of control.

Matthias

Hi sage-abuse committee,
following up, I have to report numerous escalating Code of Conduct
violations by Dima.
- the latest, which needs immediate attention:
https://github.com/sagemath/sage/pull/36726#issuecomment-1840362382

I'll follow up with more links that illustrate a pattern of severe
abusive conduct.

I would suggest communicating the following points to Dima:

1. That we understand that his frustration is *real*.
2. That we understand that his sense of the importance/urgency of his
demands is *sincere*.
3. That in the past the community has often been willing to *excuse*
his occasional code of conduct violations.
4. That, however, he is neither *exempt* from the code of conduct, nor
are his violations *justified*.
5. That the frequent violations constitute *bullying*, a form of abuse.
6. That the misconduct has to stop entirely, not just revert to his
normal level.
